20a. How does the Committee accomplish its purpose?

The scope and objectives are to advise the National Science Foundation (NSF) on the merit of proposals requesting financial support of research and research-related activities. The panel will review proposals submitted to NSF under the purview of the Office of Cyberinfrastructure (OAC). The duties and responsibilities are to review and evaluate proposals, which may include site visits, and provide written recommendations on

proposals as part of the selection process for awards.

20b. How does the Committee balance its membership?

Participation by woman and representatives of underrepresented minority participation in review panels is strongly encouraged. The panels convened were composed of scientifically qualified representatives from academia, industry, not-for-profit organizations, and the federal government and represented a wide range of disciplines relevant to their particular panel. The Office's goal was to achieve the correct mixture of panelists in direct proportion to the science to be reviewed.

20c. How frequent and relevant are the Committee Meetings?

The makeup of the panels may change each year, but the need for continuing the panels remains as long as the initiatives are a part of the current fiscal year activities of the Office.

20d. Why can't the advice or information this committee provides be obtained elsewhere?

There are no other formal/informal committees with the varied expertise required to recommend on the multi-institutional or multi-disciplinary proposals submitted to this Office. It is this multi-disciplinary aspect of the proposals and panels that allows for comprehensive review and recommendations. In all cases, the panelists complement each other thus providing the skill and knowledge for an impartial, inclusive report.

20e. Why is it necessary to close and/or partially closed committee meetings?

To review proposals that included information of a proprietary or confidential nature, including technical information; financial data such as salaries; and personal information concerning individuals associated with the proposals.

Narrative Description

The NSF mission as stated in the NSF Act of 1950 authorizes and directs the Agency to initiate and support: fundamental research in science and engineering; and science and engineering education programs at all levels and in all fields of science and engineering. The involvement of knowledgeable peers from outside the Foundation in the review of proposals is the keystone of NSF's merit review system. Their assessments of the extent to which proposals address the merit review criteria are vital for informing NSF staff concerning funding recommendations.

Cost Savings Comments

The use of panelists to review proposals for the Agency is an invaluable asset. The cost of obtaining the expertise, insight, and information received by the Office using alternative methods, such as hiring the expertise as full or part-time employees, would be extremely high.
